NEW BIOFORTIFIED, NAROBEAN 3

- Soil requirement: **Grows in all regions but requires less rain towards harvest**
- How to plant: **50cm rows x 10cm plant to plant**
- Seed requirement: **30kg/acre**
- Days to maturity: **60-75 days**
- Potential yield per acre: **720 to 800kg**
- Pests and Disease control: **spray with recommended pesticides and fungicides**

Note: *Fertilizer use increases the yield of improved varieties; in case of fertilizer use, apply DAP 40kg/acre at planting and OR Fertilizer blend for Beans as recommended.*

"PLANT QUALITY SEED, GET BETTER YIELD FOR HIGHER INCOME

Special Characteristics

- *Rich in iron and zinc (Biofortified), Tasty and swells at cooking*
- *Can be grown like any other Beans*
