TABLE OF CONTENTS

Preface	iv
Acknowledgement	v
CHAPTER 1: COMPOSITION AND FORMATION OF SOILS	1
1.1 Composition	1
1.2 Soil formation	1
1.3 Factors influencing soil formation	2
1.3.1 Parent materials	2
1.3.2 Climate	3
1.3.3 Topography	3
1.3.4 Plant and animal life in the soil	3
1.3.5 Time	4
1.3.6 Man	4
1.4 Soil physical properties	5
CHAPTER 2: SOIL FERTILITY	6
2.1 Introduction	6
2.2 Parameters that measure soil fertility	6
2.2.1 Soil pH	6
2.2.2 Plant nutrients	6
2.2.3 Soil organic matter	8
2.3 Fertile soils	8
2.4 Infertile soils	8
2.5 Declining soil fertility	8
2.6 Diagnosis of soil fertility status	9
2.7 Deficiency symptoms	10
2.8 Maintenance of soil fertility	11
2.8.1 Traditional method	11
2.8.2 Application of fertilizers	11
2.8.3 Good husbandry practices	11

CHAPTER 3: INORGANIC FERTILIZERS	13
3.1 Introduction	13
3.2 Nutrients in fertilizers	13
3.2.1 Fertilizer grade	13
3.2.2 Fertilizer packaging	14
3.3 Choice of fertilizer	14
3.4 Fertilizer types in Kenyan market	15
3.4.1 Nitrogen fertilizers	15
3.4.2 Phosphate fertilizers	15
3.4.3 N-P-K (Compound) fertilizers	15
3.4.4 Potassium fertilizers	16
3.5 Timing and placement of fertilizers	16
3.5.1 Nitrogen fertilizers	16
3.5.2 Phosphate fertilizers	18
3.5.3 Potassium fertilizers	18
3.6 Crop response to fertilizers	18
CHAPTER 4: ORGANIC MANURES	19
4.1 Introduction	19
4.2 Animal manures	19
4.2.1 Variation in quantity and quality	19
4.2.2 Litter for bedding, manure storage and dairy cattle slurry	20
4.2.3 Application of animal manure in the field	23
4.2.4 Interval of application	24
4.2.5 Amount to be applied	24
4.2.6 Advantages of using animal manures	25
4.2.7 Disadvantages of using animal manures	25
4.3 Composting and compost application	25
4.3.1 Introduction	25
4.3.2 Composting materials	26
4.3.3 Building compost heap	26
4.4 Green manure crops	28
4.4.1 Introduction	28
4.4.2 Advantages of green manuring	28
4.4.3 Disadvantages of green manures	29
4.4.4 Incorporating green manures into the cropping systems	29
4.4.5 Using green manure crop to rehabilitate degraded land	31
4.4.6 Promising legume green manure species in Kenya	31

4.5 Use of organic mulches	33
4.5.1 Introduction	33
4.5.2 Mulching materials and application	34
4.6 Combining organic and inorganic fertilizers	35
CHAPTER 5: SOIL EROSION AND CONSERVATION	36
5.1 Soil erosion	36
5.2 Agents of soil erosion	37
5.3 Soil conservation	37
5.3.1 Unploughed strip of land	38
5.3.2 A grass strip	38
5.3.3 Trash line	39
5.3.4 Stone line	39
5.3.5 Terraces	40
5.3.6 Cut-off drain	40
5.3.7 Gully control	41
CHAPTER 6: CROPPING SYSTEMS AND CULTURAL PRACTICES	42
6.1 Introduction	42
Crop rotation	42
6.2.1 Cereals (crops of the maize family)	42
6.2.2 Legumes (crops of the bean family)	42
6.2.3 Solanaceous crops (crops of tomatoes family)	43
6.2.4 Root crops (crops of cassava family)	43
6.2.5 Leaf crops (crops grown mainly for their leaves)	43
6.3 Intercropping	44
6.3.1 Methods of intercropping	44
